**SJM's The SPA at Palazzo Versace Macau Wins
SpaChina Wellness & Spa Award**

Recognised for Holistic Traditional Chinese Medicine Wellness

(Macau, 17 September 2026) The SPA at Palazzo Versace Macau, situated within Grand Lisboa Palace Resort Macau of SJM Resorts, S.A. ("SJM"), has been awarded *Best Holistic / TCM Treatment of the Year* at the SpaChina Wellness & Spa Awards 2026, hosted by SpaChina Magazine. The honour underscores SJM's commitment to integrating Chinese wellness traditions with modern therapy techniques.

The SPA at Palazzo Versace Macau blends Mediterranean wellness traditions together with contemporary Chinese therapies, combining traditional knowledge and innovative techniques in a restorative experience for body and mind. Its award-winning Signature Meridian Yin Yang Full Body Therapy draws on Eastern wellness principles, taking guests through a complete sequence of consultation, conditioning and restoration, with care extending from the feet to the head. Tailored to each guest's constitution, the treatment combines traditional massage techniques featuring alternating firm and gentle pressure with constant-temperature herbal moxibustion. Guided by traditional Chinese wellness principles of encouraging the flow of qi and blood, dispelling dampness and opening the meridians, the treatment aims to ease fatigue and restore a sense of physical and mental balance.

Founded by SpaChina magazine, the SpaChina Wellness & Spa Awards are among the region's most recognised benchmarks of spa excellence. Winners are selected by an independent panel of international industry judges following rigorous evaluation, helping to advance the professionalisation and international standing of China's spa sector.
